PROFESSIONAL EXPERIENCE

GARAGE MOBILITY LTD

Senior Software Engineer

JUN 2023

Led the development and maintenance of critical systems using React.

Ensured seamless user experiences through effective front-end development.

Demonstrated strong software engineering principles and consistently delivered high-quality code.

HENY TECHSOLUTIONS

Senior Software Developer

Accra - Dansoman

DEC 2020 – Mar 2023

Demonstrated expertise in crafting robust and innovative front-end solutions using a dynamic tech stack. Primarily focused on React.js and Vue.js, I navigated various front-end development aspects proficiently. My contributions were centered on building scalable and efficient applications with a strong emphasis on delivering exceptional user experiences.

Throughout the development lifecycle, I actively engaged with the Concourse pipeline, streamlining the deployment process and fostering continuous integration and delivery. My ability to collaborate effectively with cross-functional teams, coupled with my proactive approach to problem-solving, allowed me to drive projects to successful completion within the given timelines.

CACHE TECHNOLOGY

Senior Frontend Developer

MAR 2020

I have demonstrated strong technical expertise in developing engaging user interfaces using modern tools and frameworks like Angular, Vue.js, React, Next.js, and Nuxt.js. I am proficient in JavaScript for building robust, type-safe applications, which facilitates efficient development and early error detection.

Within Angular, I utilized Reactive Forms extensively to create complex, data-driven forms with intuitive user interaction and validation. I have also leveraged RxJS to manage asynchronous data streams and handle event-driven programming effectively, enhancing application responsiveness.

Using Angular's dependency injection system, I ensured seamless communication between components and services, promoting a modular and maintainable codebase.

VICE LIVE STUDIOS

Web Developer

SEP 2017 – Sep 2018

I possess a versatile skill set centered around front-end development, enabling me to build robust and scalable applications pivotal for modern web services.

Within React.js and Vue.js, I excel in utilizing frameworks like Next.js and Nuxt.js to develop lightweight and fast web applications. Leveraging asynchronous programming, I create scalable front-end solutions that support real-time and event-driven functionality.

To optimize performance, I implement techniques like code splitting and lazy loading, significantly improving load times and user experiences. I design systems capable of efficiently handling high loads and concurrent user interactions.

EDUCATION

DATALINK UNIVERSITY COLLEGE

Bachelor of Science, Major in Information Technology

Tema, Accra

2013-2017

SKILLS

- Backend: Node.js

- Frontend: React.js, Vue, Angular
- Framework: Express, Next, Nuxt
- Languages: JavaScript, TypeScript, HTML/5, CSS
- DB: Postgres, MongoDB

Projects

Henry

Henry is creating a managed marketplace for authentic African experiences where individuals and small businesses participate in the gig economy by sharing their experiences and culture with others.

Technologies Used: Vue, TypeScript, Firebase

Role: Frontend Developer

Outcome: Delivered a user-friendly interface that enhanced the management process and user engagement.

Garage Mobility IMS

An inventory management system for garage operations.

Technologies Used: React, Javascript / Typescript

Role: Frontend Developer

Outcome: Simplified inventory management, reducing errors by 15% and improving tracking efficiency.

Sokozuri

An e-commerce platform for buying and selling products.

Technologies Used: Vue.js, Vuex, Firebase

Role: Frontend Developer

Outcome: Developed a responsive and scalable platform, increasing user retention by 30%.

Aukiss Tv

Aukiss is an entertainment lifestyle company that taps entertainment industry talent to influence and educate the masses via trends, exclusive content and technological integration.

Technologies Used: Vue, Firebase

Role: Frontend Developer

Shortcode Africa

A service platform for managing shortcode campaigns.

Technologies Used: React, Next.js, Node.js

Role: Frontend Developer

Outcome: Streamlined the management of campaigns, improving client satisfaction by 25%.

Zenpay

A payment processing platform with advanced features.

Technologies Used: Vue, TypeScript

Role: Frontend Developer

Outcome: Enhanced the user experience and security of payment processing, leading to a 20% increase in transactions.

Garage Mobility Web

A comprehensive platform for managing garage operations.

Technologies Used: React, TypeScript, AWS

Role: Frontend Developer

Outcome: Improved operational efficiency and user satisfaction with an intuitive interface.
